

As a licensed Amateur Radio Operator and a computer owner,I object to any mandatory Digital Broadcast Flag. How is this technology supposed to do anything but close out all media production to any but the big media giants? What am I supposed to do about my family home movies when I want to send them to relatives over the internet? What about my webcam?

This proposed regulation is a sign that America has become more and more "corporate owned". Where is representation for the people who don't even know this is going on? Very little media coverage by the big media conglomerates -- of course because THEY want it - the people do not!
